<sup>1</sup>Result images located in the MNI space (neurological orientation).

<sup>2</sup>For details about the segmentation protocol see the paper: Kulaga-Yoskovitz, J., Bernhardt, B.C., Hong, S., Mansi, T., Liang, K.E., van der Kouwe, A.J.W., Smallwood, J., Bernasconi, A., Bernasconi, N., 2015 Multi-contrast submillimetric 3Tesla hippocampal subfield segmentation protocol and dataset. *Sci Data*. 2, 150059.

<sup>3</sup>All the volumes are presented in absolute value (measured in  $\text{cm}^3$ ) and in relative value (measured in relation to the ICV).

<sup>4</sup>The Asymmetry Index is calculated as the difference between right and left volumes divided by their mean (in percent).
